SUMMARY

Computer Science student at the University of Alaska Anchorage (Class of 2026) focused on frontend development and software engineering. Experience building full-stack web tools for research, with a strong emphasis on clean interfaces, data visualization, and maintainable systems.

PROJECTS & EXPERIENCE

Research Assistant, University of Alaska Anchorage

Feb 2026 - Present

- Built a **full-stack** web app for earth science field-data collection and visualization using **Django** and **PostgreSQL**.
- Implemented interactive mapping with **Leaflet.js** and data charts with **Plotly** to help researchers explore visual maps and field data.
- Designed structured forms and data models to streamline field workflows and keep collected data consistent.

Portfolio Website

- Developed a fully functional personal website using **HTML**, **CSS**, and **JavaScript** featuring interactive UI elements and custom animations.
- Designed responsive layouts with scroll-triggered reveals, dark/light theme, project modals, and a reading progress bar.

CPU-Scheduling Research

- A **research project** simulating CPU scheduling algorithms (**FCFS**, **SJF**, **SRTF**, **Round Robin**, **MLFQ**, and **Stride**), evaluating performance across metrics like wait time, turnaround time, and fairness. Conducted comparative analysis on scheduler behavior under a “**quantum gap**” condition, highlighting tradeoffs between efficiency and fairness.
-

EDUCATION

Bachelor of Science in Computer Science

Aug 2022 - Current

University of Alaska Anchorage

- Relevant Coursework:
 - Data Structures and Algorithms, Network and Security Foundations, Database Systems, Artificial Intelligence / Machine Learning, Software Engineering
-

ADDITIONAL INFORMATION

- **Programming Languages:** HTML/CSS, JavaScript, Python, C++, Assembly, SQL
- **Core Concepts:** Object-Oriented Programming, Multithreading, Algorithmic Thinking, Debugging, Problem Solving
- **Professional Skills:** Time Management, Written and Oral Communication, Attention to Detail, Adaptability, Computer Literacy
